

**KEEPSAKE MONOGRAMS v1.0**  
 © 2012 Harold Lohner

A unique font that lets you create custom 3-letter monograms in a distinctive style of adjoining script capitals with or without a choice of 10 decorative borders.

1. Install the font like any other. (Google: Install fonts in [my operating system].)
2. Relaunch the program you're working in. Now you're ready to make custom monograms.
3. Choose a border if desired and type it first, keystrokes in red.

4. Type a lowercase letter (a–z) for the left letter.
5. Type an uppercase letter (A–Z) for the center letter.
6. The right letter is a bit trickier. Use this chart to locate your letter on the standard keyboard.

A ... 1	B ... 2	C ... 3	D ... 4	E ... 5	F ... 6
G ... 7	H ... 8	I ... 9	J ... 0	K ... !	L ... @
M ... #	N ... \$	O ... %	P ... ^	Q ... &	R ... *
S ... (	T ... )	U ... - or _	V ... = or +	W ... [ or {	X ... ] or }
Y ... \ or	Z ... ; or :				

After the right-hand letter is typed, the monogram is complete and the cursor will move to the right.
