

GEM MONOGRAMS v1.0
 © 2013 Harold Lohner

Set of 2 fonts that lets you create custom 3-letter monograms in a unique faceted gemstone design. Also works for 1-letter and “A&B” style monograms.

Using the Gem Monograms fonts:

1. Install the fonts like any other. Google: “installing fonts in [my operating system]”.
2. Launch the application you want to use, create a new document, and select the appropriate font.
3. Type a frame or border if desired, using / ? or . [period]

4. Type the small left letter using lowercase.
5. Type the big center letter using uppercase.
6. The small 3rd position letters are a bit trickier to locate on the keyboard. Use the chart at the left to type the right letter.
7. For 1-letter monograms, type < before and > after the center uppercase letter.
8. For “A&B” style monograms, type ` or ~ instead of the big center letter.

A 1	H 8	O %	V = or +
B 2	I 9	P ^	W [or {
C 3	J 0	Q &	X] or }
D 4	K !	R *	Y \ or
E 5	L @	S (Z ; or :
F 6	M #	T)	
G 7	N \$	U - or _
