Set of 4 fonts to make custom 2-letter monograms in a unique interlocking ring design with the style of antique metalwork and calligraphy.

### Using the Olden Rings Monograms fonts:

1. Install the fonts like any other.
2. Type a frame first. The choices are shown below, keystrokes in red. There's also an alternate E available.

*for Solid and Outline fonts*

*for White and White Outline fonts*

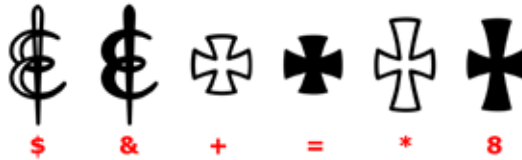

*alternate E available in either position*

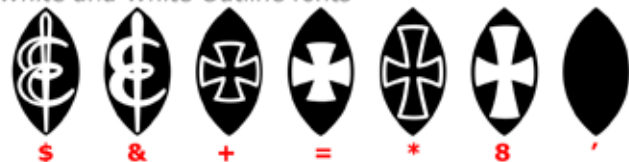

3. Type a lowercase letter (a-z) for the lefthand letter.

*for Solid and Outline fonts*

4. Type a symbol for the middle position, choices at right. For no symbol there, skip this step or type ' (apostrophe) for a solid black shape.

*for White and White Outline fonts*

5. Type an uppercase letter (A-Z) for the righthand letter. That's it!
